EXPERTISE

• Programming Languages:

Python, C, Java, SQL

• Frontend: HTML5, CSS3,

JavaScript, Bootstrap

• Backend: Django, Flask,

FastAPI, REST API

• Database: MySQL, MongoDB, SQLite

• Tools: Git, Git-Hub, Linux, Vs-Code

• Libraries: NumPy, Pandas, Matplotlib, Seaborn, Plotly, Streamlit

• Soft Skills: Leadership, Event Management, Time Management

• Language Known: English, Hindi, Bengali

• Learning: Machine Learning, Robotics, Artificial Intelligence

EDUCATION

B.Tech - CSE (AI & ROBOTICS)

BRAINWARE UNIVERSITY (2024 – 28)

BARASAT, WEST BENGAL

CAREER SUMMARY

B.Tech Computer Science and Engineering student specialising in AI and Robotics, with hands-on experience building Python-based applications and full-stack web projects using Django, Flask, HTML, CSS, and JavaScript. Experienced in backend development, REST APIs, SQL and NoSQL databases, authentication, CRUD operations, and modular application architecture. Built and deployed projects using Git, GitHub, and Render, with additional exposure to data analysis, artificial intelligence, machine learning, and robotics.

PROFESSIONAL EXPERIENCE

COGNIFYZ TECHNOLOGIES (Python Development Intern)

Feb 26 - Mar 26

- Developed and optimized Python-based applications, focusing on clean, efficient, and maintainable code.
- Develop a web scraper that extracts specific data from websites using libraries like BeautifulSoup or Scrapy.

Bluestock Infotech (Data Analyst Intern)

Ongoing

- Working on data analysis tasks and company projects involving data cleaning, exploratory analysis and insight generation using Python-based data tools.
- Using Pandas and NumPy for data manipulation, analysis and preparation of datasets.
- Contributing to multiple data-analysis projects as part of the internship; specific project outcomes can be added as they are completed.

PROJECTS

Bhojanly – Food Ordering Platform

- Built a full-stack food ordering application using Django and SQLite.
- Implemented secure authentication, cart management, order tracking, and admin dashboard.
- Designed RESTful backend architecture following the MVC pattern.
- Deployed the application on Render.
- Managed Git version control with GitHub.

Campuscare

- Developed a campus complaint management system using Flask.
- Implemented role-based authentication for students and administrators.
- Designed CRUD operations with secure database integration.
- Built responsive frontend using HTML, CSS, and JavaScript.

Finance Tracker

- Designed and developed a backend-driven finance management system with RESTful API architecture.
- Implemented modular layered architecture (MVC-inspired) to separate business logic, routing, and data handling.
- Implemented clean architecture (views → services → models) for scalable and maintainable code.
- Developed features including transaction management, financial analytics, budget alerts, and smart insights.

ACHIEVEMENTS AND CERTIFICATIONS

- Successfully completed C Programming course from IIT Bombay.
- Successfully completed Python Development Internship at Cognifyz Technologies.
- Intern at Agnirva Space Corporation Under AICT.
- Two-Times National Hackathons winner.
- Participated Multiple National Hackathons.
