EXPERTISE

• Programming Languages:

Python, C, Java, SQL

• Frontend:

HTML5, CSS3, JavaScript, Bootstrap

• Backend:

Django, Flask, FastAPI, REST API

• Database:

MySQL, MongoDB, SQLite

• Tools:

Git, Git-Hub, Linux, Vs-Code

• Libraries:

NumPy, Pandas, Matplotlib

• Soft Skills:

Leadership, Event Management, Time Management

• Language Known:

English, Hindi, Bengali

EDUCATION

B.Tech - CSE (AI & ROBOTICS)

BRAINWARE UNIVERSITY (2024 – 28)

BARASAT, WEST BENGAL

CAREER SUMMARY

Python Developer and B.Tech Computer Science (AI & Robotics) student with hands-on experience developing full-stack web applications using Django, Flask, HTML, CSS, and JavaScript. Passionate about backend development, REST APIs, databases, and scalable software solutions. Experienced in hackathons, real-world internships, and deploying production-ready applications using Git and Render.

PROFESSIONAL EXPERIENCE

COGNIFYZ TECHNOLOGIES

FEB 2026 - MAR 2026

Python Development Intern

- Developed and optimized Python-based applications, focusing on clean, efficient, and maintainable code.
- Collaborated on real-world projects applying OOP, DSA, and SQL skills.
- Develop a web scraper that extracts specific data from websites using libraries like BeautifulSoup or Scrapy.

PROJECTS

Bhojanly – Food Ordering Platform

- Built a full-stack food ordering application using Django and SQLite.
- Implemented secure authentication, cart management, order tracking, and admin dashboard.
- Designed RESTful backend architecture following the MVC pattern.
- Deployed the application on Render.
- Managed Git version control with GitHub.

Campuscare

- Developed a campus complaint management system using Flask.
- Implemented role-based authentication for students and administrators.
- Designed CRUD operations with secure database integration.
- Built responsive frontend using HTML, CSS, and JavaScript.

Finance Tracker

- Designed and developed a backend-driven finance management system with RESTful API architecture.
- Implemented modular layered architecture (MVC-inspired) to separate business logic, routing, and data handling.
- Implemented clean architecture (views → services → models) for scalable and maintainable code.
- Developed features including transaction management, financial analytics, budget alerts, and smart insights.
- Integrated MongoDB for flexible data storage and used secure authentication with password hashing.

ACHIEVEMENTS AND CERTIFICATIONS

- Successfully completed C Programming course from IIT Bombay.
- Successfully completed Python Development Internship at Cognifyz Technologies.
- Intern at Agnirva Space Corporation Under AICT.
- Two-Times National Hackathons winner.
- Participated Multiple National Hackathons.
